Notes to Unaudited Consolidated Financial Statements
June 30, 2017

NOTE 1 - BASIS OF PRESENTATION

The accompanying financial statements have been prepared by the Company without audit. In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the financial position, results of operations, and cash flows at June 30, 2017, and for all periods presented herein, have been made.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. It is suggested that these unaudited interim financial statements be read in conjunction with the financial statements and notes thereto included in the Company's December 31, 2016 audited financial statements included in its Form 10-K filed with the Securities and Exchange Commission. The results of operations for the period ended June 30, 2017 and the same period last year are not necessarily indicative of the operating results for the full years.

NOTE 2 - GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has incurred net losses and net cash used in operations since inception. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The Company's ability to continue as a going concern is dependent upon the Company's ability to achieve a level of profitability. The Company intends on financing its future development activities and its working capital needs largely from the sale of public equity securities with some additional funding from other traditional financing sources, including term notes until such time that funds provided by operations are sufficient to fund working capital requirements. The financial statements of the Company do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts and classifications of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 3 – INVESTMENTS

Marketable securities are accounted for on a specific identification basis. As of June 30, 2017 and December 31, 2016 respectively, we held marketable securities with an aggregate fair value of \$68,000 and \$0 respectively. As of June 30, 2017, all of our marketable securities were invested in publically traded equity holdings. Marketable securities were classified as current based on the percentage of the equity controlled by the Company as well as our intended use of the assets. The Company recognized unrealized gains, for the three months ended June 30, 2017 and 2016 in the amounts of \$6,248 and \$0, respectively and for the six months ended June 30, 2017 and 2016 in the amounts of \$6,248 and \$0, respectively. The Company recognized realized gains, for the three months ended June 30, 2017 and 2016 in the amounts of \$1,804 and \$0, respectively and for the six months ended June 30, 2017 and 2016 in the amounts of \$1,804 and \$0, respectively.

The Company's assets measured at fair value on a recurring basis subject to the disclosure requirements of ASC 820 at June 30, 2017, was as follows:

	Quoted Prices in Active Markets for Identical Assets and Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2017

Marketable securities	\$68,000	-	-	\$68,000

The \$3,000 of financing costs were expensed during the six months ended June 30, 2017. The Power Up Note carries an interest rate of 12% per annum from the Issue Date until the principal amount becomes due and payable, whether at maturity or upon acceleration or by prepayment or otherwise. The following discussion and analysis should be read in conjunction with the consolidated financial statements and related notes included in this report and those in our Form 10-K filed with the Securities and Exchange Commission on March 31, 2017. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in such forward-looking statements as a result of certain factors, including but not limited to, those described under "Risk Factors" included in Part II, Item 1A of this report.

Background Overview

Galenfeha was incorporated on March 14, 2013 in the state of Nevada. Our corporate office is located at 420 Throckmorton Street, Suite 200, Ft. Worth Texas 76102, and our telephone number is 1-817-945-6448. Our website is www.galenfeha.com.

We are an engineering, product development, and manufacturing company that generates revenue by receiving royalties from products we developed, providing engineering, regulatory, and business consulting services across numerous disciplines, such as aerospace, automotive, and medical, and by making investments in companies that our management team feels to be undervalued.

With the recent sale of our stored energy division, and our oil and gas equipment division, we have moved the Company in the direction our founder originally envisioned. Our objective is to be a vehicle that assembles a team and finances the development of groundbreaking new technology that is resistant to adverse economic and market fluctuations.

A condensed version of our 2017 Statement of Work is as follows:

1. Acquire or merge a profitable private company into our public company.
2. Explore investments both private and public.
3. Develop new technologies for engineering, manufacturers, and product life cycles.
4. Formulate applications for new or recently developed technologies.
5. Commercialize new technology and products.

Although information for this item is not required, the company chooses to provide the following disclosures:

CAUTIONARY NOTE TO INVESTORS: Investing in our securities, whether open market purchases or private transactions, comes with the high risk that you could lose your entire investment. Our independent registered public accountant has issued an audit opinion which includes a statement expressing substantial doubt as to our ability to continue as a going concern. We have a limited history of operations, and have to date incurred losses since the company's inception. We recently sold all divisions of our commercialized products, but retain royalties from some of these product lines.

On December 21, 2016, Mr. James Ketner was formally elected by the shareholders to assume the role of Chief Executive Officer beginning January 1, 2017. Since his reinstatement, Mr. Ketner has led the company back in the direction he originally intended; to be a vehicle that assembles a team and finances the development of new technology that is resistant to adverse economic and market fluctuations.

As of the date of this filing, Galenfeha has zero options that convert into common or preferred stock, no other notes or off balance sheet arrangements that convert into common or preferred stock, and zero debt other than to an affiliate.

The company has two classes of preferred stock. The preferred class of stock consists of two (2) series, Series A, and Series B. All affiliates of the company who purchased stock during the formation of the company and who purchased stock for financing activities at prices below market moved their common shares into the Series B preferred stock. The Series B votes 1:1; is subject to all splits the same as common; converts back to common 1:1; and cannot be converted back to common for resale in the open market until a 30 day VWAP (volume weighted average price) of \$.45 cents has been met in Galenfeha's public trading market. All future sales of company securities by affiliates will adhere to rules and regulations of the Commission.

Affiliates who purchased stock at offering prices that were current at the time of purchase, and affiliates who make open market purchases and are directly responsible for a merger/acquisition that brings retained earnings to the company, can convert these common shares 1:1 into Series A preferred stock. Series A votes 1:1; converts back to common 1:1; is not subject to splits in order to facilitate mergers, acquisitions, or meeting the requirements of a listed exchange; and cannot be converted back to common for resale in the open market until a 30 day VWAP of \$3.50 per share has been met in Galenfeha's public trading market. All future sales of company securities by affiliates will adhere to rules and regulations of the Commission.

On January 23, 2017, the Company announced on Form 8-K filed with the commission that the company entered into an agreement to sell its entire Daylight Pump inventory to SouthVest BDC, LLC for a cash selling price of \$400,000. A majority of the proceeds of this sale were to be used to repay a note secured by the pump inventory with Kevin L. Wilson on August 23, 2016, for \$350,000 plus accrued interest.

On March 9, 2017, the company sold its entire Daylight Pump inventory to Fleaux Services, LLC. The sale was for a cash consideration of \$25,000 USD; and Fleaux Services, LLC will assume responsibility of a promissory note held by Kevin L. Wilson in the amount of \$350,000 and all accrued interest this note had accumulated since issuance on August 23, 2016.

The Company currently plans to use additional revenues and earnings generated from their investment account to cover expenses and outstanding payable balances due. After all of the payable balances are extinguished the Company intends to proceed with research and development using the gains from the investment account.
